

EXTENDED C-BAND VSAT TRANSCEIVER SERIES

0, 2, 5, 10, 20 and 30 Watts

AnaSat® 5EC

EC 0-30

GENERAL DESCRIPTION

AnaCom's series of Extended C-band VSAT transceivers are available in transmitter output levels up to 100 Watts, in single or redundant configurations. Type N for 0-20W, Waveguide for 30W. These transceivers are ruggedly built for continuous outdoor duty in all types of environments. They are especially suitable for SCPC, MCPC, and DAMA applications.

The up converter, down converter, power amplifier, monitor and control and power supply are included in a single enclosure and the only cabling required to the indoor equipment are IF cables. The LNC connects to the transceiver with a single coaxial cable. An ovenized, high stability crystal oscillator is used to lock the TX and RX synthesizers. The onboard microprocessor is used to give additional temperature and aging compensation.

FEATURES

- Built in test facilities for improved maintainability and reduced dependence on external test equipment
- No indoor equipment is needed
- Frequency agile radio equipment. Completely independent TX and RX frequency selection
- Superior phase noise
- Flexible, universal power supply

FLEXIBLE APPLICATIONS

- Rural telecommunications expansion
- Industrial networking
 - LAN and WAN extensions
 - Data distribution and collection
 - Emergency link restoration
 - Conventional voice traffic
 - Remote surveillance
 - Broadcast
 - Point-of-Sales systems
 - Video teleconferencing

BUILT IN TEST EQUIPMENT

To improve and simplify maintenance routines, an external terminal (*or computer*) can be connected to monitor a number of critical parameters without use of additional test equipment. These include:

- Transmitter power output level
- TX/RX IF input level
- Power supply voltages
- TX/RX synthesizer loop voltages
- Internal Temperature
- Alarm Details

CONTROLLABLE FUNCTIONS FROM THE TERMINAL

- TX frequency and gain (*ON / OFF feature*)
- RX frequency and gain (*independent from TX*)

COMPREHENSIVE MONITOR & CONTROL

A powerful Monitor & Control feature allows you to monitor and control the transceiver on the same M&C bus with most indoor equipment such as modems and multiplexers. The Monitor & Control system can be used in combination with the unit's internal metering function to monitor operational parameters.

BENEFITS

- A family of products with significant commonality minimizes demands for spares and training
- "Last Touch" controls allow for remote configuration or local (*manual*) configuration
- Flash memory means that the transceiver always powers up with exactly the same operating conditions as when it lost power (*or was turned off*)
- Comprehensive maintenance features for operational effectiveness and minimum outages
- Simple installation
